

## ASSIGNMENT:

Create a **BOARD GAME** that can be used to help study for the CTE Post Assessment. **(this will be an ongoing project as the study guide questions are introduced throughout the year)**

- This will be a **group project** (number of group members will be determined by the teacher). Students will collaborate on the design of the game board by first researching traditional board games and making the decision **TOGETHER** on what the final design will include.
- The game will be used for a **specific curriculum** (depending on the assigned class) – example: Engineering, Architecture, etc.
- **Each group will receive the following:** cardboard (used for final gameboard), copy of the curriculum objectives, all art supplies need to complete the project, and other items as requested by the students.
- The gameboard will be graded on **CREATIVITY and NEATNESS** as well as **how it performs as a study guide tool**. (meaning that it serves its intended purpose upon completion)

# BE CREATIVE !
